Appreciating the Old Masters

Few people who attend the great modern opera, or listen to the famous concert performers, fully appreciate the depth and quality of the music they hear.

This is not because we are a people of low musical appreciation, but rather an evidence of perverted musical tastes.

Close study of the works of the great composers has resulted in the growth of many fine musical temperments.

You may be in close touch with the master minds of music when you once possess the

Kimball Player Piano

In this modern instrument there is only the Satisfaction of the master's rendition.

As sensitive as human nature, it responds to the moods and emotions of the performer.

Every advantage gained in the use of all expression levers, or any similar devices, is embodied in the Kimball Player Piano.

ENTIRE RANGE OF THE PIANO

the 88 keys of the modern instrument, is covered by this latest Kimball Player.

Upon it the youngest novice can render with perfect technique the masterpieces of the ages; in the hands of a musical mind the possibilities of fine shading, of correct phrasing, of soulful interpretation and expression, are unbounded.
